Smallholder Empowerment Platform - Introduction

RSPO | Roundtable on Sustainable Palm Oil

Empowering Smallholders

01

MENU

Empowering Smallholder farmers and engaging them in sustainable supply chains is essential for making the palm oil market more sustainable. To date, RSPO has been supporting smallholders through a variety of channels, but greater effort is needed to provoke large-scale inclusion of smallholders.

This platform connects smallholders with potential project partners, as well as providing additional resources and support. If you are a smallholder group looking for a project partner or a market player looking to support a smallholder project, register yourself today.

Smallholder Empowerment Platform - Introduction

Developed as part of the RSPO Smallholder Strategy implementation, the platform elements are:

- Oil palm Smallholders Initiatives Worldwide
- Dialogue
- Bridging Smallholders to the market - partnering finding on SH initiatives (matchmaking)

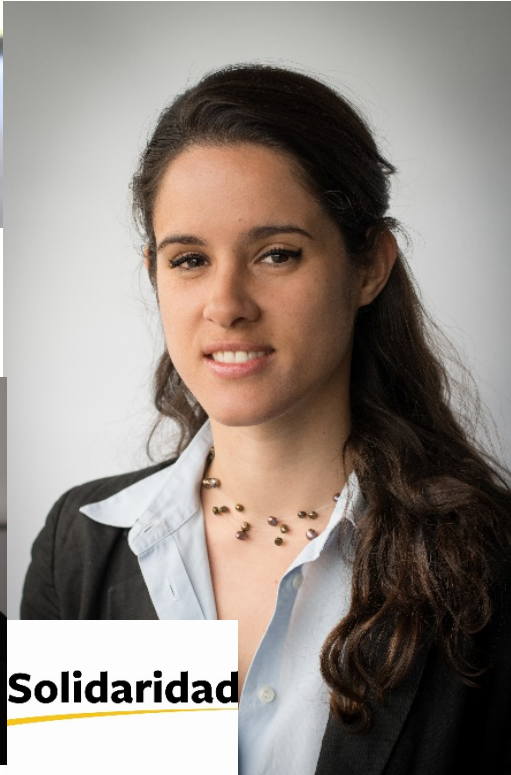

Main benefits are:

- Knowledge sharing of existing projects and initiatives worldwide
- Enhance appropriate tailor-made models for global interventions as per lessons learnt
- Facilitating project partnering throughout the value chain

Smallholder Empowerment Platform - Objectives

- Support knowledge exchange on the broader landscape of impacted smallholders ('prior' and 'post' interventions)
- Promote ongoing activities and interventions and their “on the ground” impact to serve as basis for new activities on neglected areas
- Enhance tailor-made interventions on the different continents (Asia, Africa and LATAM) addressing their regional challenges
- Bridge the gap between smallholders and market by facilitating project partnering among smallholders, facilitators and market players

Smallholder Empowerment Platform - Collaboration along the value chain
